Lead the way!

People have been using stick shaped writing instruments since the dawn of time. Once in a while the design of such an everyday item is reevaluated and questioned. In this case, the result is a design that forces us to rethink how we write and what we write with.

Unlike stick-shaped pens that rely on the strength of your grip, the **PenAgain's** ergonomic design takes advantage of the weight of your hand to apply ink to the page as you guide it effortlessly.

Join the **PenAgain** revolution!
